smile makeovers**

Smile makeovers and the use of Invisalign braces

When most people hear the word 'makeover,' they instantly picture brushes, make-up artists and false nails. But did you know that it is now possible to have a 'smile makeover' performed by our dentist?

Using the appropriate mix of cosmetic and orthodontic options (for example, Invisalign might be a suitable option) your smile can be whitened, straightened and made to be just how you've always wanted it. Leaving you with a smile worthy of the Hollywood red carpet!

What is Invisalign and how is it used with smile makeovers?

Invisalign is a removable, clear brace which slots over your teeth and uses gentle force to move your teeth into the desired positions.

Used for a number of minor to moderate orthodontic issues, Invisalign can play a part in smile makeovers. Invisalign can be used to treat the following issues:

Crowding

Invisalign can apply targeted force to crowded teeth, moving them apart and creating a more even look to your smile. All without wires associated with traditional braces!

Spacing

Similarly, this invisible brace can be used to move your teeth closer together, closing any gaps. Depending on the severity of the spacing, this may take slightly longer than correcting overcrowding.

Overbite

If your upper and lower set of teeth do not sit correctly, Invisalign can correct that too! Force applied to the front of the teeth will push them gently back into line.

Flared teeth

Protrusions can be moved forwards or backwards, to create a better look of symmetry.

We can then offer you other cosmetic treatments, such as in-chair teeth whitening to perfect that Hollywood smile!

DISCLAIMER

All treatment carries risks. Individual consultation is required with one of our practitioners to ensure that the treatment is right for you.
